Ranajit Baran Chowdhury

QA Automation Engineer / SDET · Entry-level role or internship

Pennsylvania, USA · +1 (267) 342-5565 · chyranajit@gmail.com · Open to full-time, internship, contract; remote, hybrid or on-site
Portfolio: rbchy.github.io/rbchy · LinkedIn: linkedin.com/in/rbchy · GitHub: github.com/rbchy

PROFESSIONAL SUMMARY

QA Automation Engineer looking for a first full-time QA Automation or SDET role, or a QA internship. I build and run automated tests for web, mobile, API and desktop applications in Java, Python and TypeScript with Selenium WebDriver, Playwright, Cypress, Appium, Cucumber BDD, TestNG, JUnit 5 and Rest Assured. 37 public GitHub repositories, all with green GitHub Actions CI, and 5,216 automated tests in total. I write clear defect reports, test plans and traceability matrices, and I bring long enterprise systems experience (NAVIS SPARCS N4 container terminal billing) and GMP / FDA-regulated pharmaceutical packaging work, where following procedures and documenting every step is the job.

TECHNICAL SKILLS

- **Test Automation:** Selenium WebDriver, Playwright, Cypress, Appium (Android, UiAutomator2), Cucumber BDD (Gherkin), Behave, pytest, TestNG, JUnit 5, AssertJ Swing, Page Object Model, data-driven testing
- **Testing Types:** functional, regression, smoke, end-to-end, cross-browser (Chrome, Firefox, Edge, WebKit), mobile, API, database / SQL, integration, unit, accessibility (axe-core, WCAG 2.1 AA), performance (k6, JMeter), security (OWASP ZAP), contract (OpenAPI, JSON Schema), mutation (PIT)
- **API Testing:** Rest Assured, Postman / Newman, Swagger / OpenAPI, REST, JSON, JWT / OAuth 2.0
- **Programming:** Java, Python, TypeScript, JavaScript, SQL
- **CI/CD and Tools:** GitHub Actions, Jenkins, Git, GitHub pull requests, Docker, Docker Compose, Maven, npm, Android emulator in CI, Sauce Labs, AWS (EC2)
- **Reporting:** Allure, Extent Reports, Cucumber HTML reports, JaCoCo coverage
- **Databases and Backend:** MySQL, PostgreSQL, Oracle, JDBC, Flyway, Spring Boot, React
- **QA Process:** test plans, test cases, test strategy, requirements traceability matrix (RTM), defect reports with root cause, UAT plans, Go/No-Go decisions, Agile / Scrum

QA AUTOMATION PROJECTS

RbcTcsWorld Shop – e-commerce store with a full test system

Java 21, Spring Boot, React, Playwright, Appium, REST Assured, GitHub Actions · github.com/rbchy/RbcTcsWorld

- 2,039 automated tests (2,034 passed, 5 skipped by design) behind 19 CI quality gates, all green on main; 163 requirements traced to tests.
- Found and fixed a flaky test (DEF-031): photo upload now honours HTTP 429 and Retry-After; added two Playwright regression tests that fail without the fix.
- Upgraded Playwright 1.56 to 1.65 when a new Ubuntu runner broke the browser install; CI back to green on all 14 jobs including iOS.

RbcTcsWorld E-Commerce Suite – flagship framework

Java, Spring Boot, Cucumber, Playwright, REST Assured, k6, JMeter, Jenkins · github.com/rbchy/RbcTcsWorld_ECommerceSuite

- 1,489 UI, API, contract, accessibility, performance and security tests across 18 CI quality gates; 89.3% mutation score; 129 of 129 requirements traced.

Payroll Management System – desktop and database testing

Java Swing, MySQL 8, JDBC, Selenium, Cucumber, AssertJ Swing · github.com/rbchy/PayrollManagementSystems_Automation_Java_MySql_Selenium

- 260 tests (and 160 in the companion project) run in GitHub Actions against a real MySQL 8 service with a virtual display for the Swing UI.

- Found and fixed defects in the update SQL (wrong columns), salary component totals and the amount-in-words cheque line; each fix has a test that fails without it.

Appium Mobile Automation – Android
Java, Appium 2, UiAutomator2, TestNG, Allure · github.com/rbchy/AppiumMobileAutomation

- 22 device tests on an Android emulator in GitHub Actions plus 8 unit tests; screenshot and page-source dump on every failure.

Amazon Cypress and QA Brains Playwright suites
Cypress, Cucumber, JavaScript · Python, Playwright, Behave · TypeScript, Playwright · github.com/rbchy/Amazon-Cypress-JavaScript-Automation

- 39 Cypress BDD scenarios run in Chrome, Firefox and Edge; a planted-bug check proved the assertions catch real failures.
- QA Brains e-commerce scenarios: Python + Playwright 15 of 15 passing in Chromium and Firefox, TypeScript + Playwright 15 of 15; also Java + Selenium, Rest Assured and Postman / Newman API suites.

All 37 public repositories with live CI status: rbchy.github.io/rbchy

PROFESSIONAL EXPERIENCE

QA Automation Engineer (Independent Projects)
RbcTcsWorld (Self-employed) · 2016 – Present

- Design, build and maintain BDD test automation frameworks for web, mobile, API and desktop applications in Java, Python and TypeScript.
- Run every suite in GitHub Actions or Jenkins on each pull request; keep CI green and publish Allure and Extent reports.
- Write test strategies, RTMs, UAT plans, defect reports and Go/No-Go reports.
- Develop Java / Spring Boot applications for e-commerce, payroll, inventory, healthcare and pharmaceutical packaging, and test them end to end.

Line Lead, Pharmaceutical Packaging
Sharp Packaging Services LLC, Pennsylvania · June 2022 – Present

- Lead blister-packaging lines (primary and secondary) with teams of up to 25 operators.
- Execute batch records and line clearance, and run product serialization; verify every step against written procedures.
- Work under GMP, FDA regulations and OEB (occupational exposure band) handling requirements.

Traffic Inspector, NAVIS SPARCS N4 Super User and System Consultant
Chittagong Port Authority, Bangladesh · 1979 – 2016

- Supported billing for 10,000+ container transactions a day in the port's container terminal management system (CTMS).
- Cut billing errors by 95% and kept 99.8% system uptime; trained 50+ users.
- Tested and configured CTMS container billing and MIS with STE Electronics (Singapore) and Datasoft Bangladesh.
- Loaded EDI files (BAPLIE, manifests) into SPARCS N4; configured billing events and tariff codes on Oracle 10g.

System Consultant, Designer and Programmer (Part-time)
The Computer Systems, Bangladesh · 1990 – 1995

- Designed and built custom desktop systems for sales, inventory control, billing, personnel and payroll.

EDUCATION

Master of Public Administration (MPA), University of Chittagong, Bangladesh · 1985

LANGUAGES

Bangla (native) · English (professional)
